**Subject:** RE: Update on Nantucket Memorial Airport - information regarding the stream located on airport property; Zone II; and location of water supplies  
**Attachments:** ATT00001.txt

Hi Kira, thanks for that information. I touched base with the airport regarding our conversation and they report the following:

- There is no stream, and apparently never has been
- There is no discharge to surface waters or wetlands
- They will be providing info on PFAS coordination, deicing and the wellhead, but probably not before the ENF comment period ends this Friday.

We'll be in touch in the next few weeks to follow up regarding the topics of interest. We'll send along information and may set up a conference call to discuss.

Jed

Hi Jed,  
Thank you very much for speaking to us this morning.

I am attaching a map that might be helpful for you when discussing the *possibility* of WOTUS with VHB. The attached map shows the intermittent stream on the airport property per our discussion (it's from the NHD). In addition, here's a link provided below to the map that shows two public water supplies (referred to as NTNCs) in relatively close proximity to the airport.

I am also sharing some other information from George Zoto at MassDEP's Lakeville office who is the contact for these reviews. He has included a map of the Groundwater Zone II which intersects with the northwestern edge of the airport property.

Please let me know if you have any questions.

Thanks again for your time!  
Best regards,  
Kira Jacobs
